12th Annual Winterlude Symposium Perioperative Challenges and Controversies

COURSE OBJECTIVES:

This conference intends to discuss some of the hot topics in perioperative anesthetic challenges and controversies. The focus is on frequent problems encountered by practicing anesthesiologists in both community and academic health care settings. The main objectives of the course are to:

- Review current knowledge and clinical experience in perioperative anesthetic crises.
- Develop a systematic approach in dealing with perioperative anesthetic dilemmas.
- Early recognition and proper assessment of the severity of the anesthetic challenges.
- Apply best strategies in managing patients with perioperative anesthetic problems.
- Introduce and incorporate new information and techniques to help finding the solution of the problem.

Specific Objectives:

- Preoperative investigations required compared to your practice
- Managing trauma patients presenting for the OR
- Managing obstetric emergencies
- Management of intraoperative hemodynamic instability
- Airways and your experience
- Value of regional anesthesia and its challenges

Workshops will provide opportunities to:

- Learn proper nerve block techniques for both upper and lower limbs
- Review the most recent recommendation for day case surgery
- Identify intraoperative hemodynamic problems and review management
- Review acute pain management
- Be updated on critical issues for OR / Recovery Room nurses
